accounting period to account for items that haven't been recorded yet like accrued expenses or unearned revenue

Howto Making Adjusting Entries

- 1 Identify the unrecorded transaction Determine which account needs adjustment
- 2 Determine the account affected Identify the corresponding debit and credit accounts
- 3 Make the journal entry Record the debit and credit entries to reflect the adjustment

For example to record accrued salaries you would debit Salaries Expense and credit Salaries Payable

Closing Entries

These entries are made at the end of the accounting period to zero out temporary accounts revenue expense and dividend accounts and transfer their balances to retained earnings
